To Whom it May Concern,

I have a deep interest in Tibetan Buddhism. I have translated many of the treasure books about Tibetan Buddhism, for example Bardo Thodol's "Tibets Great Yogi Milarepa" and "The Hundred Thousand Songs of Milarepa".

Through my field of work I became acquainted with Bhagwan Shree Rajneesh from His discourse on Mahamudra and His book about the core of Tibetan Buddhism, "Tantra : The Supreme Understanding". This book is a great invitation for people to explore the depths of human existance.

I think that we cannot over come the extremely hard social situations of today with out a comprehensive and fundamental insight into human existance. Mr Jeremy Rifkin, economic consultant to President Carter, quoted from a lecture presented by Mr E. J. Schumacher on his book "Entropy-A New World View". The message was stated as follows " In the present and future it is a most important question, that needs an actual answer through a fundamental insight into the problem of what is man, where did he come from and what is the purpose of life." (Re-translated from Japanese back into English.)

The wisdom and teachings of Bhagwan Shree Rajneesh have a profound insight into human existance and make a great contribution to the needs of our society. Much more so then Schumacher's book "Entropy : A New World View."

In praise of His deep wisdom, I ask you to give Him the opportunity to make His creative contribution to society.

Mr Masanori Oe.
