To Whom It May Concern,

These lines are to tell you something about myself and my experience with Bhagwan Shree Rajneesh.

At the age of 19 I started my work as a Medical Technican in the Heart Laboratory of the Cardiological University Hospital for children in Kiel.

By and by I realized that my colleagues worked very unlovingly and their effect on me was machine-like and I felt I was playing the same role. This made me very unsatisfied.

Then I heard from friends for the first time something about Bhagwan Shree Rajneesh and began to do some meditations in the German Rajneesh Meditations Centers.

I stopped my work and after two years I went to Poona to Bhagwan. I was very surprised to found out how open the people were and how they lived there with such an intensity.

I felt not to be really alive in comparison with these people gathered around Bhagwan, so that I started to join groups like Encounter, Centering, Tai Chi a.s.o. This gave me the possibility to come nearer to my inner core and I really felt that something was changing!

To sit with Bhagwan in the Satsang gave me the feeling of flowering life and great joy and much more – something that I cannot express in words.

I became Sannyasin and then I started to work in the Ashram with these beautiful, well-educated and loving people.

After half a year I went back to Berlin. My work in the University Hospital Berlin became more creative and successful, feeling more love to everybody I was working and I am still working with.

This year I saw my beloved master again. For 14 days I enjoyed the great festival in Rajneeshpuram which has become such a beautiful city.

My greatest wish is that Bhagwan can stay in your country at Rancho Rajneesh. Also I would like you to meet and experience Him, Bhagwan, our religious teacher.

Thank you for your attention

Sincerely

Sulana Ben Rahal
