Re: Bhagwan Shree Rajneesh

To Whom It May Concern:

I am General Manager of Canada's largest Soyfood Company and as such I call upon all my resources of personal and personnel management in my various responsibilities.

I was introduced to the writings of Bhagwan Shree Rajneesh some time ago, and became facinated in his efforts to bring about the basic transformation of Man through his unique and scientific approach using modern psychological techniques blended with ancient Eastern meditation patterns.

He is a man of exceptional ability in the Psychology of Personal Growth. His insights into the problems of modern man are incisive and his radical techniques have given rise to a new Psychology - often called the Psychology of the Buddhas - that has helped thousands of individuals to experience the Unity of Life and the sanctity of the individual. (I speak from experience.)

These experiences enrich the lives of the participants and leave them much better equipped to handle the pressures of daily life nomatter what their field.

I heartily recommend his therapies and scientifically designed meditations as well as his joyous way of experiencing Life.

Sincerely,

George A. Harris (B.A. McGill)  
General Manager
