

Turin 19-7-1983

To whom it may concern.

I am the director of a center of psychologists where happen groups and trainings.

I have got to know Bhagwan Shree Rajneesh through his books, his discourses, and the personal participations in some encounters groups led by his disciples.

I personally use some of his techniques that I consider a not replaceable instrument in my work. I specify that I am not a follower of his, but I have great consideration and esteem for the extents of his thought and his teachings, therefore I think right that the Government of the USA, a democratic country, respectful of the civil rights and freedom, can give him the opportunity to continue his work.
