

Dt; 24th July '83

To whom it may concern;

My name is Toshihiro Hagimori, also known as Swami Toshi Hiro.

For three years I have been an assistant of University in Tokyo and studied on community development with Prof. J. Kawakita and Prof. Y. Hara who are known very well in Japan. As our study goes deeper, I always found Bhagwan's understanding and teaching inspired me and I had a new vision of community which has more totality. Also, as I participated in research work many times, the separation of an observer and an observed made me confused and I had to drop my conditionings and mind-projections. And Bhagwan is working for that, too. After a international research in Nepal I visited Bhagwan's commune in Poona and took sannyas. I have been with Bhagwan for three years in Poona. When he left from Poona to America, I felt I have to work and spread his understandings and teachings in Japan more and more. His teaching cover various subjects.

But, it seems that Japanese people who are working in science and art don't understand the value of his wisdom and his presence. And what has happened to me after coming back to Japan was to start Sambodhi Rajneesh Meditation Center to contact with people and to set up a printing company for publishing Bhagwan's books.

Now I've been a visitor of Bhagwan's commune at Rajneeshpuram. Here, the work of community development is really remarkable. My old professors have to come for research work and have to have a proof of community development and a possibility of the inner growth of humanity. To me, it became obvious. Bhagwan is really a precious religious leader in our time.

Sincerely yours,

萩森 敏裕

Toshihiro Hagimori
