TO WHOM IT MAY CONCERN

I am a graduate of the University of Arizona, Certificate Program in Nurse Midwifery, class of 1981. I had a position as nurse midwife at the East Boston Neighborhood Health Center, East Boston, M.A., associate with Beth Israel Hospital as a site for births. Previous to this I worked as a registered nurse in labor and delivery for four years, working closely with laboring mothers and families. Much of the work I do involves counselling, caring for and emotionally supporting women and their significant support persons.

Since being introduced to Bhagwan Shree Rajneesh, through video tapes, audiotapes, books and friends, my ability to be open and available to others has blossomed. Through His religious teachings and meditation techniques my awareness and problem solving abilities have increased to afford competent, safe, midwifery care. Specifically, Bhagwan's discourses on health, birth, motherhood and relationships have aided me in guiding families through different pregnancies, labors and births.

Of all the traditional support and counselling methods taught during both nursing and midwifery training, none have touched me as the religious teachings of Bhagwan Shree Rajneesh and allowed my personal growth to expand in order to better serve my clients.

Most sincerely,

Teresa A. Booze CNM
