To whom it may concern!

I finished highschool for art in Vienna with a degree in sculpture and since 1953 I'm trying to manifest my own free ideas in sculpture, art and design. In somewhat 44 exhibitions in the whole world I had the opportunity to present my ideas to people of the various mentalities and so to discuss various topics. The reflection from all parts of the world was without doubt very positive. And therefore invitations to exhibitions and cultural gathering were following.

My relations to all the social classes are known to be very positiv and in many correspondence to be known.

I always have been a searching human being and so I also met the teachings and realizations of the great genius Bhagwan. Reading many books I had the opportunity to relate my reflexions about the wide field of the human Psyche with the thinking of Bhagwan on this topic. I have gained a lot doing so. A lot of change had occured in my own being, barries had been solved and my creative work has so been freed, more in accordance with the cosmic laws.

The new realizations I hanpily gave to other searching souls of my wide acquaintances. From all this learning soon new possibilities for the forming of its own life and of others, and for the coping of fotune had arised.

For all the above mentiojed reasons I believe, that the influence of Bhagwan for all the searching, misguided, mixed up, overinfluenced youth had contributed a most important bit of infôrma-tion, without ruining the ideals of other religions and of nature, as he sets love as the essence for a special forming of life. In This sense he is in accordance with the essence of all the reli-gions.

For myself as a catholic I would find it very sensefull, if Bhagwan especially in the country of the unlimited possibilities a residence permit for his wonderfull doings would be let out to him. This would be my warmest wish!
