To whom it may concern

I hold a degree from Munich High-School of economics (Betriebswirt grad.) and I'm engaged in magazine publishing business for now about 15 years.

Now I'm publisher of 7 medical magazines at an important German medical book and magazines-publisher in Munich, which holds also a subsidiary in Baltimore, USA.

It was about 1979, when, in the age of 37 years, I first heard from Bhagwan Shree Rajneesh. I travelled to India, saw and heard him speaking and was almost fascinated from this man. During my work for different publishing houses I had the opportunity to meet many important and interesting people, but I've never met a person like Bhagwan Shree Rajneesh.

Through him, my life changed totally both in family and occupation.

Despite I live with my wife and six

3 children, our life has been enriched tremendously through the thoughts and insights of these really great religious leaders, which he is for us, also he stays in silence.

My work has become more successful and more satisfying for my company and for me.

To me, Bhagwan Shree Rajneesh is the most outstanding person at this time, a genius as religious leader for hundreds of thousands of people and a man, who gives really hope, that uncentered will be able to manage their problems by following his knowledge.

Sincerely yours

Manfred Martin
