Bern, the 25th of July

To whom it may concern

I am a musician and composer. I studied 4 years with Miguel Rubio at the Konservatorium in Berne and finished my studies with honour. Compositions of mine have been broadcasted at the Swiss Radio Company.

I work as a teacher and composer at different schools and play in different orchestra's.

Through the influence of Bhagwan Shree Rajneesh's meditations, my understanding of music and its structures got deeply enriched.

My whole approach towards composing and playing has changed since then.

Bhagwan Shree Rajneesh's vision has tremendous influence in the field of music and, as far as I can see, in many other aspects of human consciousness. I would give him an outstanding position amongst the great philosophers and leaders of the human mankind.

Yours sincerely

J. Huber
