TO WHOM IT MAY CONCERN

I graduated in 1976 from Karl-Ruprecht-University in Heidelberg/West-Germany as a M.A. in Clinical Psychology. Since then I have been working in the field of Clinical Psychology and Psychotherapie. I have been leading therapy groups in Holland, Germany, Italy and Switzerland.

I first came in contact with Bhagwan Shree Rajneesh in 1978 over a colleague of mine. I started reading his books and was fascinated by the tremendous insight of Bhagwan Shree Rajneesh in the Human Psychology. His view changed my work immensely - a new quality and depth was added and also the therapeutic success of my work was greatly improved.

The insights of this man have influenced many lives in a very beneficial way - as families living happier together and people being more successful and content with their professional careers.

In my opinion Bhagwan Shree Rajneesh has contributed in a beautiful and positive way to improve the Psychological Health of Humanity.

Sincerely Yours,

*Ulrike Pusch*
