birth: 22-3-1944, Amsterdam, The Netherlands  
profession: teacher, artist painter, poet

To whom it may concern,

Although in truth I wished my master lived in the Netherlands to rise the level of my awareness and that of the people of my country in "a cheaper way" he is doing now in your far away and expensive America, I want to write this letter to you in favour of my masters' stay in the U.S.A. .

As an artist I'm writing from a mind that's extremely vulnerable for an atmosphere of freedom and love; better to say that I feel that the right as well as the chance for humanity to go on living on this beautiful planet, this earth, depends on its capacity to create a society that is based on these two human needs. To create such a society, first we have to develop free and loving people.

And that's exactly what I know that my master, Bhagwan Shree Rajneesh, is trying to do.

Although I'm not competent to assure you that he will succeed, I experience him as the best man available in my life right now. He is not teaching a theory, but transferring his being. Although the heart of his work is of inner transformation, it also needs to be expressed in the outer world as well, because reality is both.

If America with its specific history can't give this beautiful man a chance to help humanity transform into a non-suicidal, loving and intelligent specimen of God, it is cutting her own roots of existence.

I hope that America will recognize in Bhagwan's sannyassins the old song of the heart which drove so many people from Europe to that country of hope, love and freedom.

Please welcome my master in your country with the respects a man of love deserves.

With love,

*Vadano*
