To whom it may concern

Margarethenried, 19.7.83

Dear Sirs,

I have attained a degree in industrial management and organisation. I finished the military service and worked after that in some big companys : pharmacy, engineering , insurance. I also studied in my spare time grafic and design and worked in the advertising business. Some years I was painting pictures which I sold. This was a new step in my life. I have had some exhibitions and was traveling a lot to get more impressions. In 1981 I read the first book of Bhagwan Shree Rajneesh and in 1982 I visited a German Ashram and started to do Bhagwans meditations. My life turned immediately into a different direction, started to think positive and enjoyed my life more and more . By being a sannyasin and being with Bhagwan my way of working also changed. I worked more and more intensive than before. When I moved into an Ashram in Germany I left my job. My job there is advertising and organisation of the firms which are parts of center. Since more than one year I am working in this job and it's a totally different way of work. I am living in a commune and share all of my life with the people which are living together with me.

It is quite important for me to let you know that Bhagwan is a very outstanding and extraordinary person in this time. He is bringing us back to our essential feelings and our spirituality . He is also a very intelligent and wise man, who knows a lot about sciences, all religions in the world and psychology. I wish you can take these informations and help people like Bhagwan to stay with us.

Yours sincerely

Erich Keller
