

Ma'irem Nivedita

To Whom it may concern,  
T.A.S.  
Portland.

Today, I want to tell you something about  
Bhagwan Shree Rajneesh.

In 1969, I saw and listened to him in Bombay, India, for the first time. In his discourse, I felt as if I was hearing something very new. I was amazed and my eyes were full of tears of bliss and love.

My life was in dark and full of depression - a typical depressed Hindu woman. After listening to Bhagwan a ray of light entered into my life. The religion entered into my life.

Bhagwan's serene, loving voice just entered into my heart. Just by his being - I was blissful.

After that I had been with him in different towns in India and attended many meditation camps. My life was now, full of peace and love. My whole life was just changed. The false fears disappeared and I was breathing in freedom.

Millions of people are like me. By and by reading and listening to his books & tapes, thousands are coming to him from all over the world.

There is not a single topic of life on which he has not spoken with much deep depth Religion, politics, Science, Arts, education etc. on all the subjects are dealt by in much details. He has given a great contribution to the humanity.

The good philosophy is only able to change human behavior. There has not been such a single person on this earth who has gone into so many subjects with much depth.

Bhagwan is not only a human being or a super human being - who has achieved the heights of consciousness.

Just to have a glimpse of him, millions of his Sanyasis feel great contentment.

His Sanyasis are not in favour of wars but they are all for love. wherever his sanya ~~does~~ he makes others also happy around him

In this manner, he is not alone, millions of his sanyasis are with him, who are capable of making million of other people happy too. This is his (Bhagwan) greatest quality.

Bhagwan is a Buddha. He is attributing humanity to go higher. No other person has contributed in this way so far.

I feel very very good being on his Sanyas

Prem Nivedita
