To Whom It May Concern

In regard to the application for permanent residency in the United States of America by Shree Bhagwan Rajneesh, I wish to make some observations as to the exceptional abilities and understanding of Shree Rajneesh.

I have had an association over the last five years with the work of Shree Rajneesh, as a participant in therapeutic and professional training programs conducted under his direction within Australia and at Poona in India. I have also studied many of his books, and have worked along several of his sanyassins in the course of my work.

As a management consultant and trainer with ten year experience in teaching interpersonal skills and in psychotherapy, I would make the following assessment of Shree Rajneesh's abilities:

- 1) that he has a unique and immensely valuable capacity to extract the essential knowledge of human behavior contained within traditional as opposed to contemporary psychologies, and to communicate these in a way which makes them accessible to practitioners in the field of psychology;
- 2) that his innovations in the technology of psychotherapy represent a significant development in this field;
- 3) that his ability to generate widespread exploration of these innovations is exceptional.

Yours sincerely,
