11<sup>th</sup> July 83

In support of Bhagwan Shri Rajneesh

I was more shocked than surprised to learn about another attempt by the American Immigrants to throw Bhagwan Shree out of the States. I cannot believe that officials and some cowards stalling this problem are that insensitive to Bhagwan's vibrations. There is no need to be afraid of this.

I am a specialist anaesthesiologist in Mombasa practicing for the last 32 years. I am also specialist in acupuncture, a member of the Lion's Club of Mombasa. I was recently awarded doctorate of Med by the WHO, sponsored body called Medicina Alternas. I was one of the delegates chosen to represent the Alternative Medicine plea to float a Nobel prize that field. I visited the Karolinska Institute in Stockholm with the world delegation on 5<sup>th</sup> June 83.

I was introduced to Bhagwan Shree's philosophy through a colleague who runs Rajneesh Archana Meditation Centre in Mombasa. All my previous skepticism, objections, misunderstandings disappeared slowly as I started practicing the simple methods Bhagwan taught. I now believe he is an enlightened one with tremendous love for existence in every form. He is a Jesus, a Buddha born again. There is no need to repeat history by brandishing Bhagwan the way other enlightened people suffered.

Americans are known for their generosity. The country has all the potential to be a leader in every field. Such an opportunity, to keep Bhagwan for a better tomorrow cannot be allowed to pass by blind people leading other blind people.

EXHIBIT "A-1129"

I pray that the people in authority will gain an insight, awareness and wisdom to reconsider their proposal. Leave Bhagwan as He is, Where He is and America will be blessed by the joyous world of tomorrow
