

Copenhagen 17 th of july, 1983

Concerning Bhagwan Shree Rajneesh's permission to stay  
in the United States of America.

My name is Klaus Gormsen. I am a psychologist with a university degree from the University of Copenhagen, ( cand. psych.). I have been working for the past 6 years as a teacher in the area of self-help therapy, and co-founded a center for mutual help in personal development - emotionally and spiritually - in Copenhagen. I am not a sannyasin (Bhagwan-disciple) and have never been one. My connection to Rajneesh has been giving courses in the Copenhagen Rajneesh center since 1977. From this connection and the personal contacts with many disciples of Rajneesh, and from reading a great deal of his books, I have come to the conclusion that his contributions to the area of therapy and spiritual development, in which I am working are quite unique, connecting all the various approaches in the field with a comprehensive spiritual vision.

Even though not being a follower of Rajneesh I still consider him to be one of the most important religious teachers on the planet today, and think, that the United States should be proud of giving space to such a rare and unique person.

Kind regards

Klaus Gormsen, Cand. psych.
