To whom it may concern,

I am a 28 year old father of two and work as a lecturer in the Computer Science Department of the above College. For the past year, my life has been deeply influenced and directed by the work of Bhagwan Shree Rajneesh, whom I was introduced to during a human growth group. I have just returned from a 10 day visit to Rajneeshpuram in Oregon where he lives and so can now speak from direct experience of his work.

Bhagwan's revolutionary synthesis of Eastern religion and Western psychotherapy is taking the Science of Psychology a quantum leap in its development. His insight and integrated outlook merged all fields of spiritual, religious and psychological thought into a new holistic and curative approach to human problems. This can be seen in action in the great ecological experiment of Rajneeshpuram where successful attempts to regenerate a dying region are being made.

Bhagwan is a total man, one of those rare beings to grace this earth and inspire us in our lives. His greatness cannot be underestimated and should be recognised therefore as a unique event in the evolution of mankind. It is for this reason that I would wish this award to be bestowed upon him, as the most outstanding Indian to come to our shores, who ranks above the political victaries of Gandhi, a man whom America should be proud to have in their midst.

Yours sincerely

George Lwin  
(Swami Prem Sujan)
