To whom it may concern:

I am a psychologist, licensed in the State of California for the past 13 years. I run a private practice with offices in two locations.

While my major psychological orientation is in Gestalt Therapy, I have been greatly influenced spiritually and philosophically by the teachings of Rajneesh, the leader of the community in Oregon. His speeches and writings of which I have heard and read many, have helped me to integrate many contradictory ideas. As a result I feel much more grounded in dealing with the myriad of situations that emerge in doing psychotherapy. My clients have appreciated this in my work with them.

Sincerely yours,
Bruce Deiman, Ph.D.
