To Whom it may concern.

I became in 1982 a qualified Physical Therapist in W.-Germany. Working in hospitals gave me the feeling something is always missing. People could be helped with more feel love compassion and willpower to become healthy again and stay healthy. For most of the Patient's, miss the positive care in hospitals. At specially this place should be a warm a loving house to recover. Bhagwan made me able to see this things and pass it on to people. I could see incredible things happening to patients, when they started to watch their breath, with is one meditation given to us by Bhagwan and how blissful they would accept death. I am trained to do Shiatan (chiropractor), Breath therapy and foot reflexion massage.

I became to know Bhagwan, by meeting a Sannyasini and watching her I could see the difference between her behavior and other people. She didn't talked about him, but I got the feeling I need to go to see him.

When I arrived in Puna and saw him the first time, I immediately got the feeling this is my place, my home, where I belong to. Doing many groups, especially body experiencing group like massage and shiatan, I got a totally different vision we are able to do with our bodies and how much we can change sicknesses, like asthma and even cancer.

Through being made all this experiences. I became to see how important Bhagwan's work is, for all the people in the world. Not only to Sannyasins, but also to Throat Doctors and even to every ordinary man on this planet. We could change the hole world to a healthy and lovely place to live in.

Coming here to Oregon, as a visitor of the festival, and watching things happening and changing in short time. Everything seems possible to happen every second. It means not only building new waterpounds, nice red roads, rivers are changing completely the land shapes and maybe in a longer period of time even the weather. So this place here will be flowering and growing with life again. So fields will be growing all over the place and trees and bees.

I mean not only it could happen here, it can happen all over the world where we have deserts. But with Bhagwan things go faster and things are done and not only thought, one fantasized about it.

Sincerely

V. Upadhyaya
