

TO Whom it may concern,

Rajneeshpuram  
7-23-8

This letter is written to support the application for Bhagwan Shree Rajneesh to be granted permanent Residency in the U.S.A.

I am a classical musician who has played in the major Symphony Orchestra's in Holland over the last 8 years.

Since coming in contact with Bhagwan's religious teachings - listening to His Religious audiotapes and reading His religious books - , my way of looking at the world of Arts has been dramatically changed. Playing music and teaching students in the classical setting has become a much deeper and richer experience and it is very clear that his extraordinary insight in the field of the Arts is beyond anything that is being taught anywhere in the music academies in the world today.

Many artists in Holland and in the USA agree that His approach towards the Arts shows what an extraordinary Genius He is.

Also the Community in Oregon has brought together many artists of different backgrounds and cultures who's lives are being enriched by the presence of Bhagwan.

Together they experiment with different types of arts and myself being a musician have heard many beautiful experimental compositions that do not exist anywhere else.

It is clear that His presence in the USA  
is a beautiful enrichment and that this  
Country can be proud to have  
such a beautiful and exceptional human being.  
Living and working here.

Sincerely yours.

Gerrit Boonstra
