

July 23, 1923

To Whom it may concern,

I am writing to you about the visa application of an exceptional person: Bhagwan Shree Rajneesh, and asking you to grant his application to be in the United States as a permanent resident.

Under the category of Arts & Sciences Bhagwan has made a tremendous impact, not only on all his disciples, but for the millions who have read his books, seen his videos, or have had the tremendous experience to have been in his presence.

That Bhagwan is in the United States is a tremendous gift for all of us. The impact of his presence is of the most most significance that only the history books written years from now will speak of the acclaim and impact Bhagwan being in the United States has made.

We, as Americans are pioneers and leaders, and can truly show this spirit in granting Bhagwan Shree Rajneesh

permanent residency in America.

Speaking for myself, that I have had the opportunity to be in Bhagwan's presence, that I have been in the Buddhafield and have seen a deserted desert ranch turn into an oasis, that I have been a part and experienced the people who love and respect his religion, and that I have felt the creativity that his presence has made possible. This has mostly improved the quality of my life.

We in America have a tremendous opportunity now in granting Bhagwan his visa and I have full confidence that this application will be granted because we are an intelligent people, full of foresight open for this exceptional man, and again we recognize outstanding performance, ability, and quality of work that Bhagwan Shree Rajneesh has.

Most sincerely,

Mitzi Robin
