To whom it may concern

First of all I'm a Japanese and I can't express well in English. So please take my feelings to Bhagwan in this letter not word I try to show myself. In 1973 I started to go to the Fuji Women University and studied about the classic Japanese literature. At the same time I started to doubt about my way of life. Next year I travelled in India. After that I realized what I want to get was not in the books that I was reading in University nor the class of my Japanese literature. Result I dropped out. And I was searching something. Before I met Bhagwan I was wandering around. I was employed as a staff of the Japan-Nepal Association for 2 years. Then I made a commu with my friends to keep pigs and to grow vegetables for 2 yrs. And until now I have been making stained glass. This time I came Rajneeshpuram for Festivals. On the road I met Him. It was the first day since I met Him in His Discourse in 1980. It was really impressed me. For this 3 years I used to try to feel Bhagwan from His books and in the atmosphere of the center in Japan. But the presence of Bhagwan was over that things and came directly in myself like shining light. For me it was a energy itself. During the Festival I could meet Him and I feel His silence is really powerful more than any words. It makes me know what I have got inside. so strong.

EXHIBIT "A-1504"

Here Rajneeshpuram people from all over the world are living together without fights is miracle.

I can feel the feeling of love and the warmth of heart here I'm not a person who has something special. I just want to live my life honestly and joyfully.

And I'm very sorry that I have no words to describe how Bhagwan help me.
