

22nd July 1983

TO WHOM IT MAY CONCERN

As a disciple of Bhagwan Shree Rajneesh, I have experienced tremendous changes in my life over the past 4 years. This has not only affected my own personal life, but also the people around me. Bhagwan strongly influenced my whole being in such a way, that I now feel much more capable of handling my life and all situations life is creating for me. Since I have known Bhagwan, I moved from a rather negative space, full of anger and anxiety, towards a positive, accepting and loving space. Bhagwan, through his presence and existence offered me a taste of inner silence, meditation and unconditional love. Just seeing him driving by daily, just one glimpse makes me feel grounded, centered and connected with the whole.

Through Bhagwan for the first time in my life, I experienced gratitude to Him, to the whole existence. All these qualities that Bhagwan brought into my life, had a strong impact on everybody else around me as well. I worked as a translator for the American Army in Germany and although these people did not necessarily share my beliefs, they admitted these qualities that came into my life through Bhagwan and through me into their lives. I am strongly convinced that disciples of Bhagwan Shree Rajneesh through their openness and understanding of their inner beings and their loving attitude make life brighter all over the world.

I therefore fully recognise Bhagwan as a spiritual teacher and religious leader, whose impact can be felt in all areas of science, philosophy and sociology.
