West Germany

TO WHOM IT MAY CONCERN...

I was already doing yoga and some meditations on my own when I came to read a book of Bhagwan Shree Rajneesh. I was already searching for something unknown. I had so many questions how to approach life in all kind of situations. After reading some more of his religious books I found this man is the only one who can give me real answers - fundamental religious answers....

I did a 10 days meditation camp in a Rajneesh meditation center, I was surprised what was happening to me, so much joy was arising; I became full of energy it was overwhelming, overflowing - my whole life started to change. I went to the Anurag Rajneesh Meditation Center in Freiburg and did continuously Bhagwan meditations and listened joyfully to Bhagwan tape discourses.

My work received a new dimension. He is inspiring my creativity in a joyful relaxed way. I feel an opening which is overflowing to other people, it has a new quality. It is something of the heart, it is the language of the heart, it is a heart-to-heart communion.

Since he moved to America I was even more impressed. Now I could see how he started to make his vision real

He is creating a new commune - the East is melting into the West.

The dream of being one with nature becomes reality. The human consciousness can be transformed. In my opinion he has the exceptional ability of doing it.

Bhagwan Shree Rajneesh is internationally recognized as a great spiritual leader.

American can be proud of having him in the country.

As an architect, I appreciate the excitement of building the new City of Rajneeshpuram. The speed the city is growing shows what his love can do, it is amazing.

America is a free country just the right place for such a great experiment.

  
LORENZ WITT  
Architect

Lorenz Witt, Architect, Nägelestr, 43, 8700 Freiburg, West Germany

c/o Offices of Otto Thoss, Architect; Schwarzwaldstr. 63-65, 7800 Freiburg.
