HOLLAND

July 21, 1983

Dear Sir,

I am an Electric Mechanic, Diplome Engineer. For five years I have worked as Ships Engineer of international marine lines all over the world, and for eight years at AUZO International Chemical Industries.

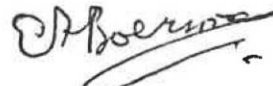

The last twelve years, I have managed and designed sewage plants for the government of Holland. I met Bhagwan Shree Rajneesh five years ago. I read his books and was surprised by his immense intelligence, knowledge and wisdom.

I see that alot of intelligent people in Holland and all over the world have recognized the same matter.

His being in this world is a great influence on my work and life.

I am infinitely grateful to be in his presence. He shows me that it is not normal that I am on this world, it is a present of the universe, and I realize that, whatever I do.

Sincerely yours,

Swami Santosh Navino
AKA: Emmo Boersma
