To Whom it may concern,

I am experienced in many fields of life, I have travelled and spent time living in four continents, I have worked in a variety of occupations including domestic, farming, medicine and construction.

I have had contact with people from many different religions, races and walks of life, and I can honestly say that I have met nobody who can match the charisma and positive influence that Bhagwan Shree Rajneesh has.

I understand that there may be some question concerning his suitability to stay in the U.S.A. I would simply like to tell you my own opinion of him.

This man is a genius of outstanding capabilities as many other people can testify. In my own personal experience, the love surrounding

Bhagwan and the people around him, the peacefulness and non-violence of their way of life can only be of benefit to the United States.

The opportunity of having such a unique man, who has written so much that is of such immense value to hundreds of thousands of people, living here in America is one which should not be missed.

Bhagwan Shree Rajneesh is not a man who can be fitted into any of the usual categories. He is original and his work is of such significance, people in America should be delighted to have him here.

Yours Sincerely,

Ma Prem Nityamo
