SWITZERLAND

TO WHOM IT MAY CONCERN

I am 45 years old, married and father of two children of school age. After many years of studies in psychology and social work I have been working for the government of the canton Zurich for the past 7 years. My work consists of material and psychological help to families, children and youths in crisis situations.

It is obvious that the quality of my sometimes very hard work depends of my own physical and psychic condition. Many people in my profession risk to compensate in negative ways like psychopharmaca or alcohol!

I have been a sannyasin for almost one year. I have experienced Bhagwan's various techniques and therapies to keep my physical, mental and psychic health, both in my private and in my professional life. It is thanks to Bhagwan's meditations, thanks to his positive thinking and thanks to the many healthy and good-natured people I meet at the Bhagwan centre in Zurich that my general condition is more and more improving. It is obvious that this has the best effect in my family life, as well as in my profession.

I hope that Bhagwan Shree Rashneesh will be give the final permit to stay in the United States and I would be extremely grateful to you if you could help him in this.
