To whom it may concern,

I am a visitor here at Rayneeshpavan, having come for the Second Annual World Celebration. It is hard for me to put into words what it means for me to be in the presence of an Enlightened being such as Bhagwan Shree Rayneesh, but what actually happens to me is this; I start to drop my problems, I become more loving, more laughing, more full and nourished inside my self. When I stand and be with him on his drive-by every day, I have a sense of a person who can help the whole of humanity through his love and kindness, who is the key to this mess that the whole world is in.

Through his guidance and blessing, humanity could pass safely through the crises of war and aggression that are presently threatening the safety of us all, and I feel that

"His presence here at Kapnashpwan is guiding us to build a city that will help in this process.

As a designer and artist, I feel that His way of presence is the quintessence of all artistic expression, for, by His grace and beauty, through His relaxation and meditativeness flows a creativity that is not just an inspiration for painters, musicians, dancers and other artists, but to all creative people, both artists and scientists to help create a more beautiful aesthetic, peaceful, world.

With love and blessings.

Sri Swami Rendrahama
