

Stgo. de Chile, Agosto 1^o de 1983

To whom it may concern:

Alvaro Rosas Henriquez, Physitian and Surgeon (University of Chile IV/1964), have worked as a specialist in Orthopedics and Traumatology during 12 years.

From 1971 to 1977 I was head of the Department of Scoliosis in the Calvo Mackenna Hospital of Santiago.

In September 1976 I was granted a Scholarship for learning Accupunture and Moxibustion in Popular China, Pekin and have been working in this speciality since then.

I affirm to know personally at least 4 persons who have said they belonged to a religious group lead by Mr. Bhagwan Shree Rajneesh, who lives in the U.S.A.

These people (whose names I could give you at any time) are professionals, or employees in companies, housewives, fathers of families and I feel very greetful for their friendship and spirituality.

I have no doubt that these people contribute a great deal to raise the harmony within the environment they live.

Dr. Alvaro Rosas H.
