To whom it may concern

I, Enrique García López, Doctor of Psichiatty graduated by the University Complutense of Madrid have got to know Bhagwan Shree Rajneesh through his books and lectures. In them I have seen his understanding of all the modern and traditional mind troubles as one of the most outstandings in the world.

I find particulary deep his vision of linking the conscious and unconscious mind of man through internal looking of one self in meditation until the whole of the mind becomes conscious and the awakening of a new human being, potential in each one of us, happens.

For all that I give my international support to the exceptional ability of Bhagwan Shree Rajneesh in Science.
