To whom it may concern,

I am a socialworker and work many years with young people, they have their special problems with parents, the older generation etc.

The method to help them is to see and understand their problems with parents, the older generation etc.

The method to help them is to see and understand their problems and to find a way with them.

Since I came in contact with the teachings of Bhagwan Shree Rajneesh already years ago by his books, I found a new way to help the kids.

During the years for me it got evident that Bhagwan Shree Rajneesh is one of the greatest teachers about the problems all my young people have. Without this contributions the socialsciences would not be on this high standard.

Without his teachings the modern socialsciences would miss very important parts. So for me Bhagwan Shree Rajneesh is important and i would never to miss his teachings and books.
