- West Germany -

July 24<sup>th</sup>, 1985

To whom it may concern:

I am a saungasiu now for more than two years, I took saungas when I came to Poona during a travel through India. I travelled to India out of political interests and I was fascinated of what was going on in the ashram. I knew a little about Bhagwan from books and a cinema movie. What I saw and felt in Poona was just unbelievable. It was a smell of lightness and love I couldn't withstand. Since that I got more out of just seeing the theories of studying. - I study biology, especially ecology. When I visited Rajneeshpuram for the First Annual World Celebration in Summer 1982 I was delighted to see what happened already to this dry and exhausted country. A small oasis appeared which was crowded at that time with a lot of people who all treated their environment with love and awareness. Many

parts of the world are turning into desert -  
here was started the way back. It is a  
part of vision to rebalance ecology.

Back to the second Annual World  
Celebration during this summer I could  
see how much happened - in a  
really relaxed way.

A huge number of festival participants  
arrived like a soft wave, enjoying the  
atmosphere of just being together with  
Blaywan who is silently with everybody  
wherever we go.

Yours sincerely

Regine Reulandt
