To whom it may concern,

Our Master, Bhagwan Shree Rajneesh, needs to stay in the United States. Through him and since the time I took sannyas, my life totally changed. A new consciousness arised.

I was studying education for four years at GH Bamberg, Germany. Reading several books about education, psychology and sociology, discussing different theories of all these theoretical subjects, I came to the point, that theoretical consideration is not the way to experience the meaning of education. I was not interested anymore just to look at others, but to look at myself and more and more the question arised, who am I?

In August 1979 I went to Poona for half a year. I did various groups in the ashram with trained group leaders and experienced the daily life in the presence of Bhagwan Shree Rajneesh. Just being there, listening to his daily discourses and daily meditations, gave me a strong impression of what he was lacking every morning. His vision of a new man was

directly led by the saanyasins.

This idea is carried on now here in Rajneeshpuraam and will become even much stronger.

When I went back to the west I could not continue my studies. I started working in our centers, called Rajneesh Meditation Centers. I felt a total new source of energy and I looked for new ways to express them. Positive and direct ways.

I worked in the different projects of the centers, as a waitress, a cook and at the bar. I am amazed how much creativity arised and still is on to move.

In the restaurant or the coffee house or the bistro or the disco again and again I was amazed how our guests were touched by our atmosphere, our service, our treat. We got direct feed back how people appreciated what we just started to live. The little things matter, which touch the guests. Like the arrangements of salads, meals, how guests get served their meals etc.....

Or in our disco they could directly feel how much joy is possible, fun and lightness.

Love and care, acceptance and understanding people feel, where ever they enter a saanyas project.

The way we care for us and the others, the way we care for ~~our~~ things, how everybody takes responsibility for what he/she is doing, impresses everybody.

Our love, felt in our hearts, flow into our work, our relations, our daily life. It creates an atmosphere, which attracts a lot of people.

Our Master gives us the courage to allow it. And whatever project sanjayasins start, laundrymen work or doctors office, health centers or shops, we spread our love and show, that something else is possible. Something totally new.

I cannot imagine my life without my master Bhagwan Shree Rajneesh. Seeing him again during the first and second annual World Celebration 82/83 touched me so deeply. The satsangs, the discourses, the daily rides, just seeing him is so strong.

And the city Rajneeshpuram, which is becoming bigger and bigger, is such a strong expression of what our Master tries to show us.

You can see it, feel it, smell it, wherever you go on the sandi his presence is felt.

When so many people gathered for the festivals, you also could see it everybody's eyes. Joy and ease, love!

A great chance for everybody. Very easy to miss. It is the greatest opportunity for us to find again our true nature.

Sincerely
Ma Anand Prapiti
