TO WHOM IT MAY CONCERN

I am a small animal veterinarian and at the same time involved in the Humane Psychological Field. In my search of guidance and new qualities in my life I was drawn to meet and experience Bhagwan Shree Rajneesh. I had heard of him as being an exceptional person and religious leader of great knowledge and wisdom. His outstanding view and understanding of sciences is having now an obvious and impressive effect not only in my work as a veterinarian but also throughout the world in the different meditation centers. This vision is, before all, becoming reality at the present time in Rajneeshpuram, Oregon. This community has grown within a year out of nothing into a flourishing city and farming community.

In my point of view this has only been possible in the presence of this exceptional man. His being in this place, this silent strong support radiates through all the work being done there. There is to me no question that Bhagwan Shree Rajneesh is the creator of a new man with a new consciousness. His abilities and broad knowledge in Ecology, Psychology, Agriculture, Medicine are visibly and extraordinarily being moved in the work of building such a city. I have come to visit this place and I can tell that I am really very much impressed by all the work and also the happiness of people living there.

Yours very sincerely,

Dr. Heidi Derendinger
