

TO WHOM IT MAY CONCERN

I took my Masters Degree in Law in 1965 at the University of Genoa, Italy, and then I did a research in sociology and psychology.

I then started therapeutic groups for minors who had been in prison, in re-education schools, and psychiatric hospitals (this from 1963-1969).

For two years I was the director of a cultural group belonging to ANCIFAP (a professional center) and was working with industrialists.

From 1971 to 1975 I was the director of a school of rehabilitation for young mental handicapped for the city of Milan whose aim was to bring these minors back to a normal school.

I am now a disciple of Bhagwan Shree Rajneesh. I came in contact with Him through some books and then met him in Oregon. I want to stress how deep is my admiration for such an extraordinary person who has contributed so much to my life. Thanks to Him I have been able to bring to my work a total vision and solve all the dilemmas that sociology and psychology had left unresolved.

I am surprised that the American authorities are not proud of his presence in the states as He is contributing to the progress of human kind and is a worldwide point of attraction.
