To Whom it may concern,

I am writing a letter about Thagwan Sree Rajuesh and how his presence has influenced and inspired my life.

Grown up in a catholic german family I got trained as a nurse and passed the exams. Three years work in a general hospital in Germany brought me in contact with many extreme situations of life. During that time I first came to know about Thagwan Sree Rajuesh and his vision about life and how it can be lived in a different way.

When I finally met him personally in 1980 I listened to his discourses, took part in the commune life and

What his teachings are. I became a samyasis. Returning to the hospital, people started asking about what had happened to me, who this man was that my being a nurse and my life changed so much. My whole way of meeting ill and also dying people became a lot different, more positive, more loving more satisfying for them and me.

When I participated in the First Annual World Celebration in Rajmestipuram I could feel how much more intense all this was because he is actually present. After these few days I knew how valuable his presence was and could be to any other country in the world.

It shows in the creativity and positivity of the people who live and work here

and created this beautiful place.

I felt it when I went back to Europe how much of it I could take with me and also give to others.

May I hope that this helps to clear any misunderstanding and to consider that this man is a person of exceptional abilities.

Thank you

Yours sincerely

Ma Prem Ananda
