OR.

To whom it may concern,

I am an electrical engineer from Edinburgh Scotland. I have a B'Sc in electrical engineering and have worked in the field for many years.

I first heard of Bhagwan in 1976 while attending a meditation workshop in London. I had been looking for 'something to expand my life' and found it in Bhagwan's methods of meditation.

Since that time I have read Bhagwan's books, watched videos, heard his discourses and have sat in his presence. For me Bhagwan has the vision, the wisdom, the love that can illuminate humanity.

He is beyond categoric and is
the hope for mans future.

There is living amongst us
a man who is experiencing
truth. That such a gift is
available to us is a blessing
indeed.

For me there can be no doubt
that Bhagwan's living in America
is a blessing to his religious
followers, is an economic boost
to the state and a taste
of truth for the whole
country.

Yours

With Love
