

To whom it may concern.

Milan, 28-7-

My name is Swami Deva Saddhen and I too
sanyas in Rajneshpuram while I was there for
the festival and asked there to become a disciple
of Bhagwan.

I went there just to have a look and try to feel
this Master so long I heard of.

For the first time in my life I lived with so
much people in commune in a Buddhaland that
meant for me the first opportunity to have a re-
touch of what is inside me.

It's a step in this trip that began with the encounter
with the Master.

He was absolute quiet and silent but now again
can't realize how it happened that I was so up-side
down only seeing him or living in an atmosphere
that was so full of life: yes simply full of
wish of living.

What I've brought with me coming home is:
life is a mystery.

And this thing I considered a gift from the

Master is accompanying me in my ordinary life while I'm practicing, in my meditation manner and most of all while I'm working behind a computer machine in my daily job.

So I feel that Bhagwan Shree Rajneesh is a beautiful material possibility, with his presence in this world, to get closer to our real state of being. Seeing him living in that wonderful land of Oregon makes me feel so glad, also because his energy is going to increase positively the relation between the human beings and with the nature too. I think that never as in this case has a great value the statement: the silent is gold!

Bhagwan Shree Rajneesh with his silent is going to give the opportunity to discover the gold that's inside all of us.

I really think nobody would like to miss it!!

SW. DEVA SADDHEN
