To whom it may concern!

I am a technical designer and before I made my education, I went to high school. When I finished my education, I get my first contact with Bhagwan. Suddenly I only wanted to live together with Samyasis. It is beautiful to live together with Samyasis and I made a lot of experiences about myself.

I am Samyasin since two years and I became a center worker one year ago.

Working in the center is working in a Buddhafield, and it's nice. I get more contact to Bhagwan and I feel more open and love to other people. And: life is so much beautiful being a Samyasin of Bhagwan.

This year, when I was in Rajneeshpuram, I was even more in contact with my Master, by the heart to heart - communication. When I opened my heart to him, I felt his love and his wise energy. All my experiences aren't to explain with words; they are going through the soul and the heart. And that's don't need any words.

I learnt to know +o enjoy the life, the
nature, all things around me. And
really: Life is not a problem, it is a mystery!
And that's a very important point for
me. My work as an Sannyasin is a worship,
a meditation.

Yours faithfully
